FEATURES & SPECIFICATIONS

STAINLESS STEEL
JETS

- 6 Person Lounger Spa with Walk-in Steps
- 87" L x 87" W x 40" D
- 106 Therapeutic Stainless Steel Jets
- Ultra Wave Lounge™ with 52 Jets, 3 Speeds, and 7 Preset Patterns
- Soft Touch™ Controls and Energy Saver™ System
- Exceeds the California Energy Mandate for Energy Efficiency
- Automatic Filtration Cycle and Built-In Filter
- Maintenance-Free Weather Guard™ Cabinet
- Patented WaveMax™ Seat
- HydroMax™ Seat
- 3 Air Controls
- Dual Adjustable Collar Jets
- Cascading Adjustable Waterfall
- Tactile Volcano-Jet Foot Massage Dome
- Gallons: 510
- Dry Weight: 875 lbs
- Filled Weight: 5129 lbs
- 4 KW Heater
- Soft Pillows
- 12 Volt Light
- Dimensions: 82" L x 79" W x 40" D
- (3) 5.2 BHP 2-Speed Hi-Flow Pumps
- 240 Volt System, Requires a 60 Amp GFCI Installed by an Electrician (Not Included)
- Easy to Use Balboa Digital Electronics Panel with LCD Temperature Read-Outs

ULTRA WAVE LOUNGE™

The 52 jets of the Ultra Wave Lounge™ provide a pulsating wave massage 1 or 2 rows at a time from your neck to your toes. 7 function programmable controls provide different massage patterns at 3 variable speeds over your body.

WAVEMAX™ SEAT

The patented WaveMax™ Seat Includes 20 jets for a revitalizing hydrotherapy massage, with 7 jet patterns at 3 different speeds.

PATENTED DURA-BOND™

This four layer, patented strengthening process combines the beauty of Lucite Plus Acrylic™ with a layer of ABS for shell strength and integrity. Then a double strengthening material is applied. This high density material has all the strengthening properties of fiberglass without the environmental concerns.

SHELL STRENGTHENING SYSTEM

1. Acrylic Plus™
2. ABS
3. Dura-Bond™ with Foam Insulation
4. Polyethylene Foam
5. Weather Guard™ Cabinet
6. Polystyrene Insulation
7. Radiant Foil Insulation
8. Thermal Air Barrier
9. Moisture-Resistant Polyethylene Flooring

POLAR INSULATION SYSTEM™

- SYNTHETIC WEATHER GUARD™ CABINET
- THICK LAYER OF POLYSTYRENE FOAM BETWEEN THE FRAME AND CABINET
- HEAT REFLECTIVE THERMAL-BLANKET FOR MAXIMUM CABINET HEAT RETENTION

All QCA Spas come with our double layer Polar Insulation System™. A thick layer of polystyrene foam and a heat reflective thermal-blanket on the wall and floor retain heat within the cabinet. (Recommended for outside air temperatures of +10° F and above).

MAINTENANCE-FREE WEATHER GUARD™ CABINET

All QCA Spas feature our patented, maintenance-free cabinets. The cabinet panels are made from the finest synthetic material with a natural wood grain appearance. It won't split, crack, peel, or splinter. It is insect proof, moisture proof, rot resistant and fade resistant. These panels are known for their rich, beautiful appearance and long lasting durability. They feature fully removable access panels that make service a breeze.

SOFT TOUCH™ CONTROLS

State-of-the-art digital electronic control with LCD temperature and filtration readout. All functions are located at your fingertips.

ENERGY SAVER SYSTEM™

Heat is generated by the spa's power equipment inside the cabinet. This heated air is captured and returned to the spa's water. This continually helps maintain the water temperature without running the heater as often. The heat recovery system saves you money by reducing electrical cost.

HI-EFFICIENCY SUPER FLOW PUMP

Most hot tubs have a "circ" or circulation pump running 24 hours a day 7 days a week to make sure your water is filtered continuously. But the cost of running it that often is neither cost-saving nor energy efficient. With QCA Spas Hi-Efficiency SUPER Flow Pump, you can run your QCA Spa for as little as 4 hours a day and receive the same effectiveness as a traditional circ pump with our low power draw, 230 Volt, 1 Amp 5.2 BHP Hi-Efficiency Super Flow Pump.

It pushes the maximum pressure through our Spectrum Halo Jets to give you the most relaxing experience in your spa. This method is the most effective for filtering your spa water and minimizing your energy consumption that not only saves you money but helps save the environment.

24 hour circulation pumps run at 3 amps (\$16.20/mo.) 24/7 burning a lot of electricity. Your spa only needs 4-8 hours of circulation, you can run your QCA Spas Hi-Efficiency SUPER Flow Pump for a full 8 hours on low speed of 1 amp a day and pay only...

**18 CENTS/ 8 HR. DAY
OR \$5.40/MONTH**

PUMP STYLE	COST PER MONTH (RUNNING 4 HRS./DAY)	COST PER MONTH (RUNNING 8 HRS./DAY)
QCA SPAS HI-EFFICIENCY SUPER FLOW 5.2 HP PUMP	\$2.70	\$5.40*

*Based on \$0.10 per Kilowatt hour. Circulation/filtration pump only.
Based on local power cost. Price will vary.
